**ACHIEVEMENTS OF PROJECT**

**ACADEMIC YEAR 2015-2016**

**Best Paper award**

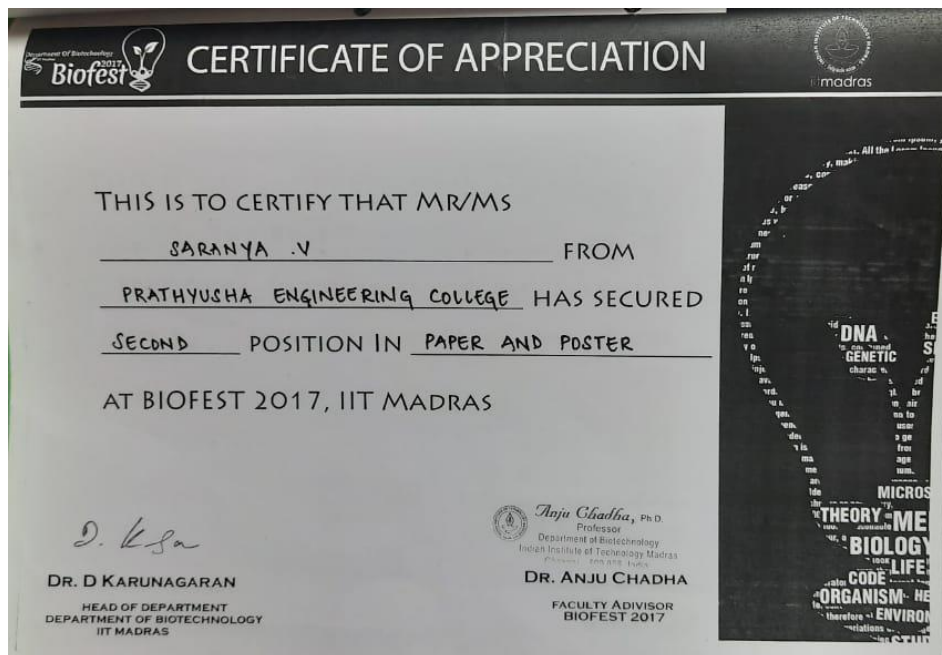

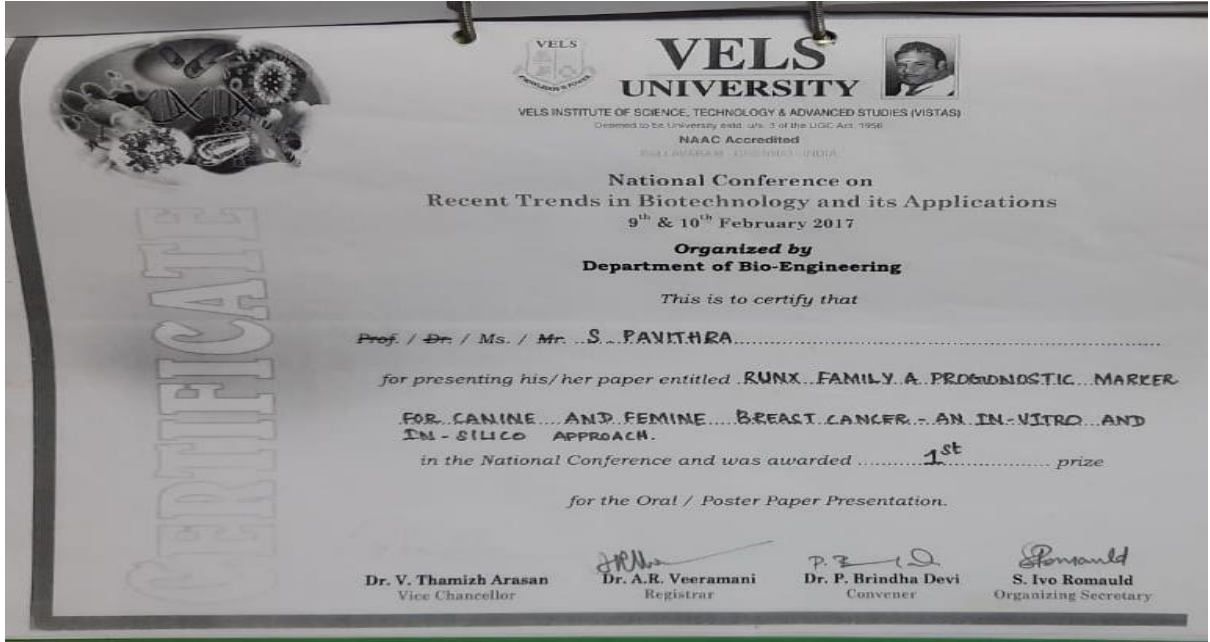

**Photo: Leena, Keerthana, Kaviarasi and Sri Devi (IV year BT) received Best paper award in National seminar at SSN college of Engineering, Chennai on 31.07.2015**

**Photo: Ms. R.Aishwarya (II year BT) received Best paper award in National seminar at CECRI, Karaikudi on 27.02.2015**

**ACADEMIC YEAR 2016-2017**

<b>Student name</b>	<b>Year /sem</b>	<b>event</b>	<b>Achievements</b>
S Pavithra, Neha M HemDev	IV/VIII	Recents trends in Biotechnology and its applications - Conference	Won the cash prize for the best paper award on 9.2.17 to10.2.17 at Vels university
Saraswathi P.L, Yuvarani and Sandhya	IV/VIII	Biofest-17	Won the cash prize for the best paper award at IITM
Aishwaraya. R	IV/VII	TEST 16' - Trending researches in engineering, science & Technology - 2016	Best paper award on 30.9.16 at Institute of Engineering and Research, Salem, Tamil Nadu
Vidhyalakshmi J, Punitha, Radhika	III/V	Transfigures in Bioscience and Technology , TBST- 17	Won the cash prize for the best paper award on 10.3.17 at Madha engineering college
Manibala J	VI/VIII	Mindkraft 2k17	Won the cash prize for the best paper at Karunya University

**Biofest** **CERTIFICATE OF APPRECIATION** 

THIS IS TO CERTIFY THAT MR/MS  
A. YUVARANI FROM  
PRATHYUSHA ENGINEERING COLLEGE HAS SECURED  
SECOND POSITION IN PAPER AND POSTER  
 AT BIOFEST 2017, IIT MADRAS

Registrar  
(Dr. C. Joseph Kennedy)

Vice Chancellor  
(Dr. S. Sundar Manoharan)

## ACADEMIC YEAR 2017-2018

Ms. NAAVARASI.N.R , III YEAR BIOTECH has won FIRST PRIZE and a CASH PRIZE of Rs.1000 for Poster Presentation on her project "Zinc oxide Nanoparticles of Green origin or Chemical Origin : A Compararitive Study" in a National event BIOSPECTRA'18 organized by BIOMEDICAL ENGINEER'S ASSOCIATION, COLLEGE OF ENGINEERING, ANNA UNIVERSITY, GUINDY held during 08.03.2018 - 10.03.2018

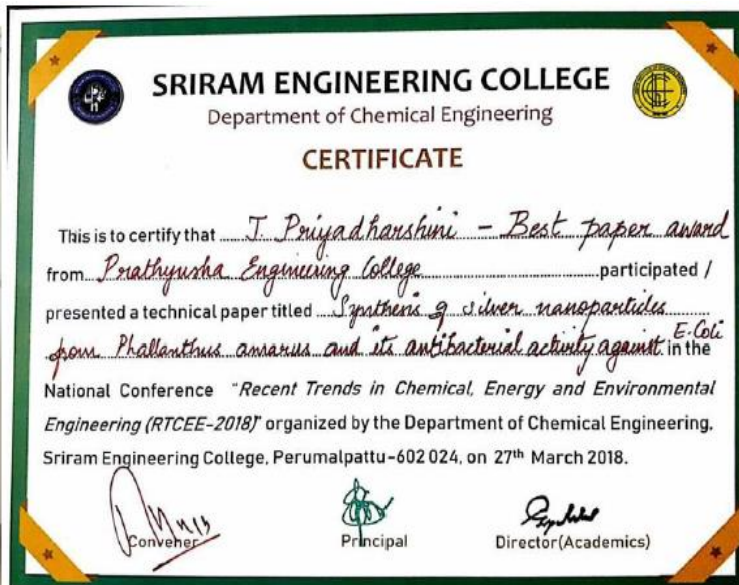

Ms. HEMAMALINI.S and Ms. YUKTHA SHREENIVASAN from II YEAR BIOTECH department has won FIRST PRIZE - BEST PAPER AWARD for Paper Presentation on their project "Comparative study on production and optimization of Biogas by effective solid waste management" in a National conference on "INNOVATIONS IN CHEMICAL ENGINEERING FOR SUSTAINABLE DEVELOPMENT" organized by Department of Chemical Engineering, SSN COLLEGE OF ENGINEERING held on 28.03.2018.

Ms.PRIYADHARSHINI.J from II YEAR BIOTECH department has won FIRST PRIZE - BEST PAPER AWARD and a CASH PRIZE of Rs.500 for Paper Presentation on her project "Synthesis of silver nanoparticle from Phyllanthus amarus and it's antibacterial activity against E.coli" in a

National conference RTCEE'18 organized at SRIRAM ENGINEERING COLLEGE held on 27.03.2018.

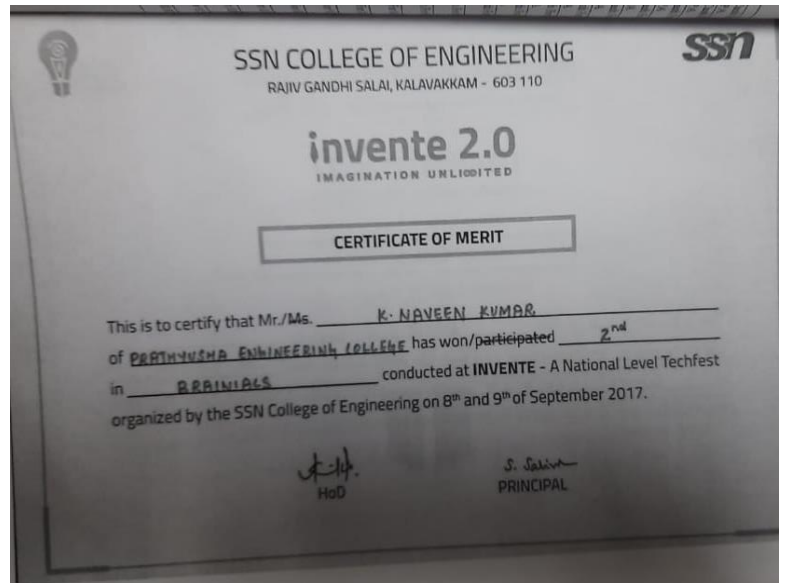

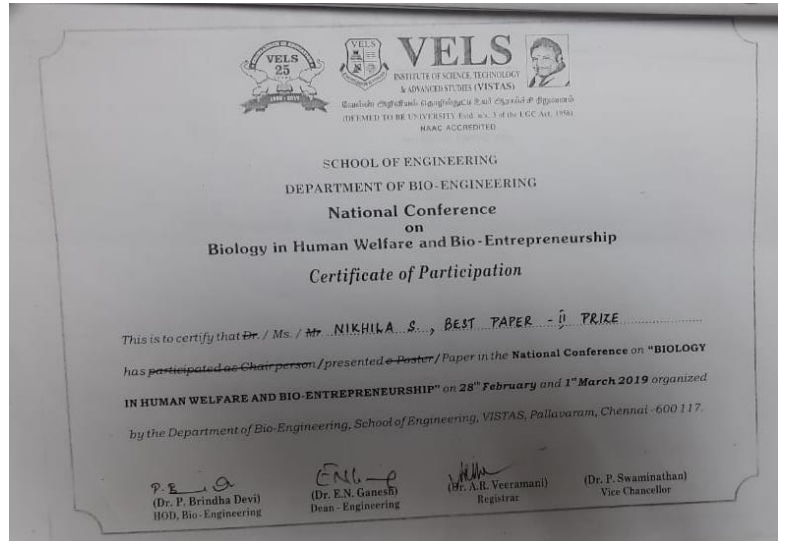

Dharanyaa Gurunathan, Sindhudevi Chandrasekar and Praveena A presented poster in TYROTEK 2K18 Symposium at St. Peter's College of Engineering and Technology on 30.01.2018 titled "In-Silico Evidence for the Insecticidal activity of compounds derived from *Musa Sapientum* peels against *Helicoverpa armigera*" by Dharanyaa Gurunathan, Sindhudevi Chandrasekar and won **First Prize of cash Rs. 1000.**

**ACADEMIC YEAR 2018-2019**

<b>Student Name</b>	<b>Year /Sem</b>	<b>Event</b>	<b>Achievements</b>
R.Rajeshwar K.Naveen Kumar R.Vikram	IV/VII	Invente3.0 At Ssn Engineering College, Chennai	Brainics: 2nd Prize – Rs.1500 Cash Prize
R.Rajeshwar K.Naveen Kumar N.Srinivasan	IV/VII	Invente3.0 At Ssn Engineering College, Chennai	Scientelligence: 1st Prize – Rs.2000 Cash Prize
S.Purushothaman G.HarirajKiran R.Vikram	IV/VII	Invente3.0 At Ssn Engineering College, Chennai	Mettalino : 3rd Prize
Purushothaman G.HarirajKiran N.Srinivasan	IV/VII	Invente3.0 At Ssn Engineering College, Chennai	Tellurians : 3rd Prize
Nikila	II/IV	National Conference On Biology In Human Welfare And Bioentrepreneurship At Vel's University	II Prize - Cash Award Rs.500 For Paper Presentation
Bhavadharani Dharshini	IV/VIII	Students Project By TNSCST	Rs. 10000/ For Project Titled Development Of An Innovative Nutraceutical Fermented Beverage From Ashwagandha Extract

### ACADEMIC YEAR 2019-20

S.NO	NAME OF THE STUDENT	YEAR	ACHIEVEMENT
1	Ms. Charumathi and Nagavasudha	IV	Best poster award at International Conference for Biotechnology and Nanotechnology held at B.S.Abdhur Rahman Crescent Institute of Science and Technology on 30th September and 1st October 2019.
2	Ms. Nihar Sultana and Swetha	III	Third year for receiving best paper award in oral presentation at International Conference for Biotechnology and Nanotechnology held at B.S.Abdhur Rahman Crescent Institute of Science and Technology on 30th September and 1st October 2019.
3	Ms. Sakthi Rajeshwari	III	Best poster award for E-poster presentation at International Conference for Biotechnology and Nanotechnology held at B.S.Abdhur Rahman Crescent Institute of Science and Technology on 30th September and 1st October 2019.
4	Ms. Yuktha Srinivasan	IV	Won 2nd prize in the national conference on recent trends of biotechnology in vel tech high tech on 12-14 <sup>th</sup> Mar 2020.

Vel Tech High Tech Engineering College  
Dr. Sakunthala Engineering College

## DETAILS OF SPECIAL PARTICIPATION IN NATIONAL LEVEL EVENT

S.No	ACADEMIC YEAR	NO OF STUDENTS PARTICIPATED	NAME OF THE EVENT	INTERNATIONAL/NATIONAL/ STATE	POSITION HELD
1	2017-2018	4	CONCRETE CHALLENGE AT IIT MADRAS	NATIONAL	II PRIZE
2	2017-2018	4	CANOE INNOVATION CHALLENGE AT SRM	NATIONAL	II PRIZE

1. Our Civil engineering students Mahesh.N, Karthick Yadhav, Bharath kumar and Kumar G has won the second prize in Concrete Challenge contest held at IIT Madras. 100 teams participated from various reputed engineering colleges. Out of six teams, three were our teams and finally our one of these three teams has made it.

2. The Winners from Our Civil Department Ajithkumar, Dinesh, Harikrishnan and Karthick Yadava from The four day #National\_Level Techno-Management fest\_ "Aaruush, SRM University" in an exclusive "Canoe Innovation Challenge"

DEPARTMENT OF EEE

ACADEMIC YEAR 2018-2019

Our EEE Dept students Balu Ashok, K.Balachandar, S.Balachander project title "Avant Grade E-Bike" won the Bronze medal at National Level Design Contest organized by National Design and Research Forum(NDRF).

Entrepreneurship Development Institute of Tamilnadu in partnership with Forge Factory, Coimbatore conducted a 56 hours Hackathon 18.1 for final year Engineering students from 7th Feb to 9th Feb 2018.

35 teams have participated in that event, out of which our Final year EEE students Balu ashok, Balachandar.S, K.Balachandar, J.Balaji, B.Goutham and L.Jagadeesh team have won the First prize worth Rs.5 lakh.

Our EEE dept students Padmesh, Naveen and Shreevishnu won THIRD PRIZE for their project on "Modelling of Electrostatic wind energy converter with solar panel design" in NATIONAL CONFERENCE on "RECENT TRENDS IN ELECTRICAL ENGINEERING - NCRTEE'18" held on 09.03.2018.

Our EEE students Padmesh, Naveen and Shree vishnu won FIRST PRIZE and a CASH PRIZE of Rs.3000 for "EWICON" project in International Conference held at VELTECH MULTITECH DR. RR DR.SR ENGINEERING COLLEGE on 10.03.2018.

Our EEE students Yuvaraja and Premkumar won FIRST PRIZE in paper presentation for their project "A NINE SWITCH THREE PHASE MULTILEVEL INVERTER FOR RENEWABLE ENERGY RESOURCES" in NATIONAL CONFERENCE PROJECT EXPO " AAVISHKAR 2018" held at Veltech High Tech Dr.Rangarajan Dr. Sakunthala Engineering College on 02.04.2018.

**ABSTRACT**

Water scarcity and field monitoring are big concern at recent times. This project is used to irrigate the farmland and also protect the field from trespassers. In an efficient manner with an automated irrigation system based on a water capacity needed for a particular plant will be irrigated. Soil moisture sensor is used to find moisture level in the field and based on this a periodic notification is displayed to the farmer and the system will automatically switching the console of the motor pump. For field monitoring a motion sensor is used. During trespassing, a notification is passed to the farmer and he can control his farming field.

**ABSTRACT:**

The main objective of our project is to provide automatic booking of LPG gas and detection of leakage in the gas and alerting the user. The level of the gas is monitored by the load sensor and if it is below the sensor threshold value an automatic message is send to the gas service provider. The leakage is detected by the Mq2 gas sensor and it is notified to the user through sms notification and the gas is automatically turned down to prevent fire accident. The booking of the gas is monitored by IOT.

**ABSTRACT**

Diabetes mellitus is a chronic disease, lifelong condition that affects the body's ability to use the energy found in food. The level of morbidity and mortality due to diabetes and its potential complications are enormous and pose significant healthcare burdens. It is a complex and time consuming task in detecting the risk of acquiring diabetes mellitus when a large amount of data is manually processed in the clinical environment. The objective of this paper is to simplify the process of analysing and detecting the risk of developing diabetes. Patients' details are gathered and stored in the form of Electronic medical record (EMR). Association rule MAJORng and decision tree induction are applied to the records stored, in order to obtain the set of rules that are to be satisfied. C4.5 or Support vector machine is used to classify the data set accordingly and summarization techniques are used to summarize resultant possibility of acquiring diabetes.

**ABSTRACT:**

This paper describes about creating a mobile application that is desired to create an awareness among the people about Sansaad Adarsh Gram Yojana (SAGY) and its purpose to public. The application details on the 5 major development plans under SAGY (Personal, Human, Economic, Social, Environment) and various other details (MP Details, Village Details, Schemes, Notification, Gallery and Organization Associated). It also maintains information regarding past, ongoing and future events. The future events are notified to the users via non-intrusive push notifications. The various schemes of SAGY are grouped into 31 categories. The user selects one of these 31 categories while registering into the application. Notifications are sent to the users based on the category they select. The objective of these schemes are to bring the perception of Mahatma Gandhi of bringing developed villages into existence.

**ABSTRACT**

Sentiment analysis or opinion MAJORng is the computational study of people's opinions, sentiments, attitudes, and emotions expressed in written language. It is one of the most active research areas in recent years. Its popularity is mainly due to Social media like Facebook, Twitter, YouTube review videos, is the platform, where people express their frank opinions and thoughts about any event or program. To understand the feedback of the viewers, social media is employed as the best tool. Twitter is the world's most powerful and the 9<sup>th</sup> widely viewed social media platform. To analyse the sentiments for a channel program, a twitter API is created to extract tweets and preprocess them, to analyse the sentiments through the back-end process. Finally, the sentiment analysis is visually represented in different perspectives of sentiments, which can easily aid the enhancement of quality of the program, to provide the best entertainment and satisfy the audience.

**ABSTRACT**

This paper helps us to understand the various data MAJORng technologies used in diagnosing heart disease in patients. Datasets of patient details are collected with correspondence to the risk factors with which the medical practitioner can predict the disease before it occurs. The term MAJORng means bringing out patterns which are hidden and previously unidentified for better grasp of the particular problem. Several data MAJORng techniques such as the Classification algorithms like Decision tree, Genetic algorithm, Neural network, Artificial intelligence, Naive Bayes, and Clustering algorithms like SVM, K-means and KNN are the techniques that are utilized in this process. Many models for this prediction system are developed, comparisons are made and the accuracy level of every model is provided.

**ABSTRACT**

Mobile or smart phones are becoming an essential device for all types of people irrespective of age group and literacy. This can improve the condition of Indian agriculture but also the life and working conditions of the farmer. Advances in Information and Communication Technology (ICT) are promoting agriculture in India. Computational power and interconnection capacities have contributed smart phones and tablets to become an essential tool in agricultural sector. Our agriculture project using mobile application discuss everything about providing notifications on various agricultural updates as per user requirements , crop cultivation based on humidity of the environment , provides experts suggestion during cultivation on his/her mobile phones. The updates varies from rate of product to stocks of other products in the market, this is helpful for farmers around the state. This app updates is mainly concerned about specific group of customers which is farmers, its update status on a particular product is as per the user choice.

**ABSTRACT:**

Cloud computing is an online data centre for providing a large amount of computing and storage resources for various service applications with high quality. However, cloud users no longer possess their data in a local data storage infrastructure, which would result in auditing for the integrity of outsourced data being a challenging problem. To help the users complete verification of the integrity of the outsourced data has become a key issue. The secure Encryption and de-duplication techniques are used to solve this problem, from which the users can resort to a third-party auditor (TPA) to check the integrity of outsourced data and Encryption algorithm MD5 is used to secure the data outsourced. The duplication of data has been avoided using the De-duplication techniques by comparison of files in the user database using php ,this will enhance the memory efficiency of the storage and the processing time is reduced.

**ABSTRACT:**

Security is the most important thing concerned in the day-to-day life. Safety and security of the new born baby is the concept of the child abduction alerting system. The system focuses on the alerting and tracking the motion of the abducted child in hospitals. PIR sensors are used to detect the motion of the cause or any activity that when the child get abducted. The GSM modem is use to send the alert message to the parents or the hospital management when the child was abducted by the thieves. In this the tracking of the abducted child is tracked by using the Bluetooth device and Smart phone. The PIR sensor sense the presence of the intruder and the Controller reads the signal from the sensor, if the intruder is detected it turns on the buzzer and sends the alert message to the predefined number through the GSM. The system consists of MQ135 and temperature sensor to detect the temperature and Air Quality in the room.

**Keywords:** PIR sensor, GSM module, Arduino UNO.

**ABSTRACT:**

The main aim of this project is to find the best pedagogy to be used and implemented in the current education system. Based on the evaluation the results are being generated. Pedagogy is the discipline that deals with the theory and practice of teaching. The existing pedagogy practices are adaptive teaching, cross learning, computational thinking, incidental thinking etc., Questionnaires are given to the students and graph is generated based on their results. Our aim is to find the best pedagogy practices to be implemented for higher education.

**ABSTRACT**

For the elderly people the rate of death due to the fall is increased recently. CDC (Centers for Disease Control and Prevention) stated that falls are one of the major cause for both the fatal and non-fatal injuries. Simple fall such as slipping may seem harmless but they can actually lead to severe injury or death in the senior citizens. CDC created the STEADI (Stopping Elderly Accidents, Deaths, and Injuries) initiative to make fall prevention routine. Physical activity and inactivity mechanisms differ and it is not maintained properly. In addition, physical activity primarily prevents accidents soon to make precaution. In our system, we are implementing system where the complete activities of the patient are monitored using advanced Accelerometer sensor, the predefined alert of the patient can be determined and alert can be done to the patients. Here, accelerometer sensor is placed on the body. Motion tracking devices designed for the low power, low cost, and high-performance requirements of smart wearable sensors. In this the determined data is given to the data processing unit. The sample test has been done on the people, various gestures are predefined and it will investigate the body activities and it will through the data samples from the processing unit.

**ABSTRACT**

The vast improvement in Information technology has led to the development of Internet of Things (IoT). Nowadays human health care system uses IoT for the convenience of physicians and patients and also used for real- time monitoring of patient information. The proposed system uses Body sensors for monitoring patient's temperature, blood pressure, pulse rate, ECG etc. The output produced by the sensors are analog data which is transformed into digital using the Arduino UNO microcontroller. The output can be viewed in the LCD display and computer. This system uses GSM module to transmit the real-time patient's data to the physicians and family members. The main objective of this system is to monitor the patient health condition and wirelessly transmit the details to the physician's mobile phone.

**ABSTRACT**

Social networks are a popular way to model the interactions among the people in a group or community. Understanding the dynamics that drive the evolution of a social network is a complex problem due to a large number of variable parameters. This problem is commonly known as the Link Prediction problem. In the traditional link prediction problem, a snapshot of a social network is used as a starting point to predict, by means of graph-theoretic measures, the links that are likely to appear in the future. In this paper, we introduce cold start link prediction as the problem of predicting the structure of a social network when the network itself is totally missing while some other information regarding the nodes is available. As a result the lack of topological information the traditional methods cannot be applied for solving the link prediction problem. We propose a two-phase method based on the bootstrap probabilistic graph. The first phase generates an implicit social network under the form of a probabilistic graph. The second phase applies probabilistic graph-based measures to produce the final prediction.

**ABSTRACT**

Our project dissert the concept of device for children. Using this device the parents can easily track the child using GSM technology. The advantage of this device is that, it does not require any expensive smart phone and the user does not need te chnical knowledge. In market many devices are available, but it is only using WIFI and Bluetooth with the specific range. Therefore t he focus of this project is to have the SMS text alert communication between parents and the device. Thus the GSM mobile communicat ion is almost present everywhere. The parents can send the text to the device with keywords about the “LOCATION”,” TEMPERATURE”,” PIR sensor” and “BUZZ “ the device will reply back to the parent mobile about the real time accurate location of the child which will provide the directions of the child location in Google map app and the surrounding location temperature and the PIR sensor ra diation so that the parents can keep track of child with ease. This prestige of this project is that people in the surrounding of the child could instantly react if the child is in danger. This device provides the more security for the children.

**ABSTRACT**

Traffic classification is an emerging topic in the field of computer science. The Classification and the analysis of the network traffic is useful to avoid the traffic congestion while transferring the data. The classification of traffic refers to categorizing the traffic according to its various application type and also helps in managing the overall performance of a network. The flow of traffic analysis is an essential piece of knowledge for engineering a network. However, with the rapid evolution of the internet applications the effectiveness of the customary methods like port based, payload based. The Machine learning algorithms has achieved high accuracy and best results. The use of Hello Packet for the classification makes easier in analysing the real-time network which adds accuracy to the existing system. The accurate classification is achieved using the hello packet which classifies the network in an effective way and transfers the data through the easier and the shortest path.

**ABSTRACT**

Online student feedback system is the web based feedback collecting system from the students and provides the automatic generation of a feedback which is given by students. We have developed student feedback system to provide feedback in a quick and easy manner to the particular department. So we called it a student's feedback system which delivers via the student staff interface as online system which acting as a service provider. By using this technology we can give feedback in online system as fast as compare to the existing paper feedback system. The existing system carries more time to do a piece of work for this reason the online system feedback is implemented. Students will fill online feedback using a standard form. In this project security is also maintain that is the result of feedback is only visible to authentic user.

**ABSTRACT:**

A web application to find out the mental ability of a person and provide mind education strategies would be formulated. It has been seen that there is no automated system/software for analyzing the mental ability of a person. A survey depending on student's age is done which consists of scenario based questions and categorization (weak, average or bright) is done based on that. Once categorized, mind education strategies can be incorporated. The methodologies used can be reading comprehension on motivational articles, role play, various group activities, visit to rehabilitation centres, prison, hospital etc. After completing every task, the student has to report their experience. Once they complete all the tasks, assessment can be done by providing task on "how they tackle the given situation". By this the change in students are noticed and suggestions are provided.

**ABSTRACT:**

Our idea is to develop GPS-based dengue risk index app which is mainly used to predict the outburst of dengue diseases in user's location. The prediction is based on analysing climatic condition. The climatic parameters that are used in analysis are temperature, rainfall and humidity. Linear regression algorithm is used to extrapolate in the multidimensional space to predict the threat of dengue exploration at user's location. The dengue risk index score will indicate and alert the user to take some immediate precautionary measures to prevent from dengue infection

## First Year Events 2018-19

### **1. Date : 04-10-18 & 05-10-18**

Event : Motivational programme by Arulmani & Team

Topics : Handling social media, self confidence, goal setting, Attitude, motivation and public speaking.

### **2. Date : 24-11-18**

Event : Essay competition conducted by English Club for I year students

Topic : Essay writing competition was conducted for I year students .This was done with the motive of making the students to develop writing skill, creative thinking and boldness to express their thoughts. Programmes like Elocution, Debate, Quiz, JAM etc were conducted.

The prize winners are: CSE: 1. Rajendra Prasad 2. Mohammad Fahad ECE:1.Kanishka 2. Nawya BIOTECH:

1. V. Vaishnavi 2. V. Praveena MECH:1. Jaswanth 2.Ciyaan ECE-B &EEE:1. Y. Vijaya Sree 2. K. Shanmuga Priya.

### **3.Date: 25-01-19**

Event: Awareness programme on Plastic pollution by I year students

Topic: Rally, Chart work on Avoid plastics, Essay competition, Stalls displaying alternate materials to plastics, presentations on plastic awareness etc.

### **4. Date: 29-01-19**

Event: Honourable PM Pariksha Pe Charcha 2.0 programme.

Topic: Discussion on Exam reduction stress speech by Honourable PM through video conferencing. He was interacted with Students of Schools and Colleges. It was an unique interaction where students, parents and teachers will join from India and across the Globe.

### **5. Date: 31-01-19**

Event: Quiz competition ,Enviroquest'19 at WCC.

Topic: S. Kavya and A.Abigail Johanna of CSE A has participated in the intercollegiate quiz competition Enviro Quest '19' organized by the center for Environmental Studies, at Women's Christian College, Chennai.

### **6.Date : 09-02-19**

Event: Coding Challenge'19

Coding Challenge'19 was conducted by CSE department. Many of our I year CSE students participated in the event.

### **7. Date: 21-02-19 & 22-02-2019**

The Two days \*Mega Technical Workshops cum Contest\* organised by the software technical clubs of CSE department on 21st & 22nd Feb 2019 at PEC Campus.

Dr.Dooreen Robin, Director ,CIRF is the chief guest for the inagural ceremony and delivered inagural address.

Students participated in 8 workshops organised by 8 technical clubs. Workshops on Deep Learning, Graphical Tool UNITY 3D, Data Analytics using R-Tool, Machine Learning with Python, Android App Development & MOO Tools

Finally all the clubs conducted contests at the end of the session and prizes were distributed to the winners and certificates to the participants.

### **8. Date : 01-03-19**

#### **Event: Creknobs'19**

We are gad to inform you that our first year students have won prizes for various events at Creknobs'19 organized by Department of management, Saveetha Engineering College on 1.03.19.

Winners are as follows:

- 1.Mr.Srikumar(CSE) won first prize in the event memes creation.
  2. Mr.Sathwik (CSE), Mr.Ciyaan (MECH) and Mr.Amrith (ECE) team won first prize in the best manager event.
  - 3.Team consisting of Mr.Srikumar (CSE), Mr.Vaikunth (MECH), Mr.Sathwik (CSE), Mr.Ciyaan (MECH) and Mr.Amrith(ECE), Mr Yashwanth (CSE) won second prize in short flim making.
- kudos to all the participants.

### **9. Date: 10.04.19**

#### **Event: INDUSTRIAL VISIT FOR FIRST YEARS**

We would like to share the Industrial visit to \*HINDUSTAN COCA COLA BEVERAGES PVT.LTD.\* at nemam on 10.4.19 for our I year MECH & EEE students to get industrial exposure .We thank our management, principal and first year coordinator for providing this wonderful oppotunity to our budding engineers.

We would like to share the Industrial visit to \*XCEL solutions\* at ambatur on 10.4.19 for our I year CSE students to gain knoweldge in the field of mobile applications.We thank our

management, principal and first year coordinator for providing this wonderful opportunity to our budding engineers.

## Events

Date: 28.08.2017 – 01.09.2017

Event Details **FIRST YEAR ORIENTATION**

All first year students. <b>OUTCOME: Students were motivated on soft skills listed by AICTE. (Students aspiration, Self-confidence....)</b>	
--	--

Date: 04.09.2017 – 06.09.2017

Event Details **BRIDGE COURSE FOR FIRST YEAR**

All first year students. <b>OUTCOME: To bridge the gap between school and engineering education.</b>	
---	--

Date: 11.09.2017

Event Details **AWARENESS PROGRAMME**

---

All first year girls students <b>OUTCOME: Awareness was created to the girls about the topic “WHO AM I” by Ms.P.Sasikala (AP/MMM Hospital).</b>	
--	--

Date: 19.9.2017

Event Details **POSTER DISPLAY - SWACHH BHARAT**

Selected Students from all departments. <b>OUTCOME: Students were given awareness on the need of green and clean campus and effective use of energy.</b>	
---	--

Date: 19.09.2017

Event Details **AWARENESS PROGRAM**

Selected Students from all departments.	
<b>OUTCOME: Students were given awareness on the need of green and clean campus.</b>	

Date: 19.10.2017- 14.10.2017

Event Details **YOGA CAMPAIGN**

First year hostellers	
<b>OUTCOME: Students learnt stress management by practicing yoga.</b>	

Date: 14.10.2017

Event Details **SCIENCE EXPO**

First year hostellers	
<b>OUTCOME: Students were exposed to mini projects and projects done by various students of Tamilnadu.</b>	

Date: 11.11.2017

Event Details **PLANTING OF SAPLINGS**

First year hostellers
