

PRATHYUSHA ENGINEERING COLLEGE

Software to Assist disabled :

NVDA Screen reader installed in PC's which helps the blind candidate to access the computers.

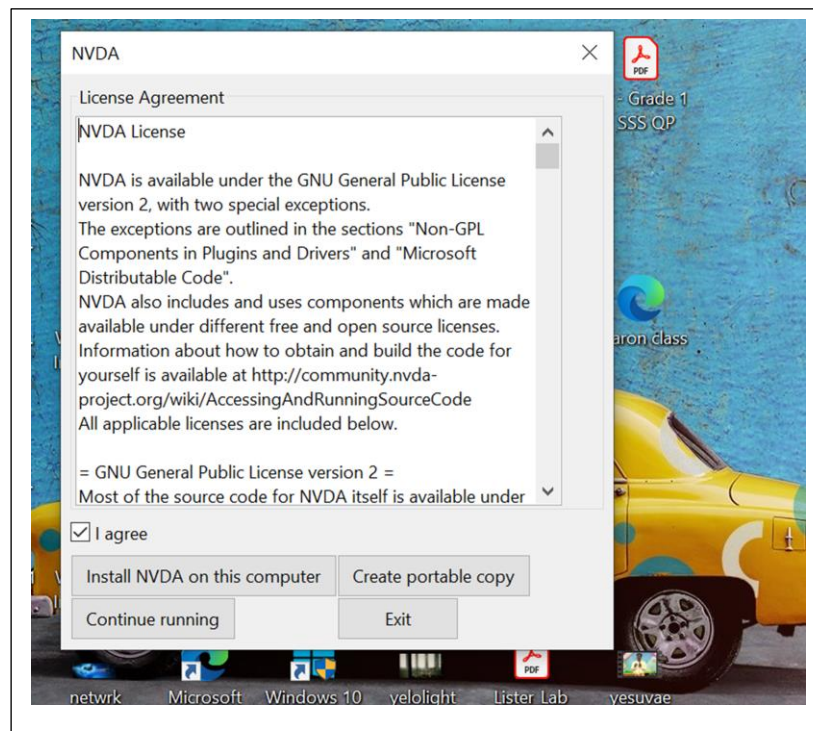

<https://www.nvaccess.org/download/>

NVDA VERSION 2020.4

The NVDA screen reader can be downloaded free of charge by anyone. We do this because we believe everyone, especially the world's poorest blind people deserve access to computers and a way out of poverty. If you have the means, no matter how big or small, please consider making a donation before downloading NVDA. We rely on donations and grants to continue improving NVDA and to ensure it remains compatible with the world's rapidly changing technology.

Please note: NVDA is only available for PCs running Microsoft Windows 7 SP1 and later. If you require a version of NVDA that can still run on Windows XP or Vista, please download the much older NVDA 2017.3 for Windows XP instead. NV Access does not however recommend or support running this older version on newer Operating systems.

Software : MathPlayer

MathPlayer enables users to copy and enlarge equations or hear them read aloud via text-to-speech.

MathPlayer

Accessible math for all!

MathPlayer 4 available free!

Design Science MathPlayer™ is a universal math reader that now enables math to be spoken in assistive technology products. MathPlayer continues to have the most advanced support for MathML of any renderer available, including support for MathML 3 features such as line-breaking, indentation and elementary math, and supports both visual rendering and speech in Internet Explorer ([requires Enterprise Mode in IE11](#)).

MathPlayer is based on MathML technology and we make it available for free in order to foster the adoption of MathML in the math, science, and education communities. [Download MathPlayer>](#)

Do you have the latest version of MathPlayer?

Use our [MathPlayer Installation Check](#) page to see if you have the latest version. If you need to upgrade, find out about [MathPlayer's new features](#) here.

MathPlayer User Manual

Right-click on an equation and see what MathPlayer lets you do with it! You can cut-and-paste math into any one of a growing number of MathML-compatible software packages, such as Maple and Mathematica. You can open it in our MathFlow and MathType products for further editing, reuse in your own documents, and much more in our [MathPlayer User Manual](#).
